- Excellent Team Player
- Good Work Ethics
- Ability to Empower Others
- Ability to Coach & Teach

Education

Lahore Garrison University

**Bachelors of
Computer Science
(BSCS) – 24'**

Izzy AR (Account Receivables)

- Built a complete backend structure of chasing clients with invoices due through emails. Got hands dirty with Stripe Subscription Payments, Xero Integration in platform. Lead the project.

Workout/M meal Plan Generator

- It's an Ai Based tool where a user can generate his meal or workout plan by just giving some details. OpenAI api utilized in the backend side to generate the response bases on some inputs given by the user.

Portfolio With Admin Panel

- This is an admin panel based portfolio creation tool. A user just need to provide the required information which gets utilized on the client-side web to build the portfolio.

Resume Generator

- It's built using React, Node.js, and MongoDB is a web application that allows users to create and manage their resumes online.
- It allows users to enter their personal information, education history, work experience, and other relevant details. The application then generates a professional-looking resume that can be downloaded or printed

Covid-19 Tracker (Frontend)

- The COVID-19 tracker built using React and Material UI is a powerful and informative tool for anyone looking to stay up-to-date on the COVID-19 pandemic. It provides a comprehensive view of the global situation and helps users make informed decisions about their health and safety.
